DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8 and 38-45 drawn to a method and system for using a collaborative commerce application to provide a user with information associated with a first component that is part of a second component of a fluid processing plant, classified in class 345, subclass 719.

Claims 16-19 and 53-56, drawn to a method for using a collaborative commerce application for searching a particular component for use in a fluid processing plant to collaboratively review fluid processing plant design, classified in class 345, subclass 719.
 - II. Claims 9-15 and 46-52, drawn to a method and system for using a collaborative commerce application to collaboratively review fluid processing plant design, classified in class 705, subclass 27.
 - III. Claims 20-30 and 57-67, drawn to a method for using a collaborative commerce application for performing a dynamic pricing event for a component for use in a fluid processing plant, classified in class 705, subclass 7.
 - IV. Claims 31-37 and 68-74, drawn to a method and system for using a collaborative commerce application to allow a user to certify a manufacturer for use in the procurement of materials for a fluid processing plant for performing a dynamic pricing event for a component for use in a fluid processing plant, classified in class 703, subclass 1.

Art Unit: 3623

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as displaying a graphical model of the second component on a display at a client site. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, III and IV, restriction for examination purposes as indicated is proper.

3. A telephone call was made to Alexander Shvarts on May 1, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
